### Where can the Widget be placed?

The widget can be used in the following templates:

- Product List Item Zoned Template
- Product Quick View Modal Template
- Cluster Item Zoned Template

### Widget Options

Option	Use	Comments	Available from Version
Description	A short description of the widget's use.	This description is added to the widget title. It makes the widget's use clear on the template page.	All
Layer	The layer the widget is valid for.	Use <a href="#">layering</a> to limit widget content to certain groups of users.  To use the same widget for more than one user group but with different options set, add the widget as many times as needed in the same zone. Then add layering to define the user group each time.	All
Show Ribbons?	Whether product ribbons are displayed on the image.	Default: ON  Toggle to disable	All
Product URL Prefix	Prefix inserted into the product URL before the product name.	Primarily used during existing site upgrades, so existing URLs can be maintained.	All
Use Hyperlink?	Product image is hyperlinked to the product's detail page.	Default: ON  Toggle to disable	All

Override Image Url Prefix	Prefix inserted into the image filepath for products in the list. Useful for overriding the default image and displaying an alternative set of images.		All
Product Picture to Use	Product image to be displayed (eg. Picture 1, Picture 2, etc).	Default: Picture 1	3.88
Only Render Basic Html Image Tag?	Whether the alt tag is included.	Default: OFF Toggle to enable.	3.88
Enable Gallery View?	Display a clickable image thumbnail gallery for products with multiple images. 	Default: ON Toggle to disable.  <b>NOTE</b> - If Gallery View is enabled, default images set by the 'hero' tag will not display in product lists.	4.37
Gallery Image Path	Path of folder with product images for gallery view.	Default: /images/ProductImages/250/	4.37
