Widget Options

Option	Use	Comments	Available from Version
Description	A short description of the widget's use.	We recommend this field be updated so the widget's purpose is clear at a glance from the template page.	All

Layer	The layer the widget is valid for.	<p>The layering technology allows for the content to be shown to specific audiences.</p> <p>This is handy if the content is only valid for a certain type of user, or if the same widget is required for more than one audience but different configurations are needed.</p> <p>The widget can be added to the zone more than once and the layer feature can determine which audience can see each widget.</p>	All
Show Category Subtitle	Determines whether subtitle content is displayed under the title.	<p>Default: OFF</p> <p>Toggle to enable</p>	3.88
Show On Category List Page?	Determines whether the page title is displayed on the category list page.	<p>Default: ON</p> <p>Toggle to disable</p>	All
Show On Product List Page?	Determines whether the page title is displayed on product list pages (such as search results, favourites, product categories).	<p>Default: ON</p> <p>Toggle to disable</p>	All
Static Web Pages Found Message	When Static Content Search is enabled, this message will display when the system finds non-product pages on your site that match the search keyword.	Default: \{0\} web page(s) found with contents related to your search.	4.14.00
Titles			
Search Results Title	<p>The title text displayed when viewing search results.</p> <p>Use the placeholder '{0}' where you'd like the search term to appear.</p>	Default: Search Results	All
Favourites Title	The title text displayed when viewing the Favourites page.	Default: My Favourites	All
Prior Purchases Title	The title text displayed when viewing the list of prior purchases.	Default: My Prior Purchases	All
Default Category Title	The title text displayed when viewing the list of product categories.	Default: Product Categories	All
Category Subtitle Field	If 'Show Category Subtitle' is enabled, set the category field that will populate the subtitle content.	<i>No default</i>	3.88
