Widget Options

Option	Use	Comments	Available from Version
Description	A short description of the widget's use.	We recommend this field be updated so the widget's purpose is clear at a glance from the template page.	All

Layer	The layer the widget is valid for.	The layering technology allows for the content to be shown to specific audiences. This is handy if the content is only valid for a certain type of user or if the same widget is required for more than one audience but different configurations are needed. The widget can be added to the zone more than once and the layer feature can determine which audience can see each widget.	All
Static Content Search	The default is to search only products to match keywords. Change to include content pages such as articles and blogs. **Include Static Content Search**: Searches both products and static content that match the keyword(s). **Static Content Search Only**: Searches products only. **NOTE -** Including static content options are shown only when Content Search is enabled. See: Static Content Search.	Default: disabled	4.14.00
Use Suggestions?	Determines whether suggested searches are offered to the user. These are based on previously entered (successful) search terms over a defined period. 	Default: enabled Toggle to disable	All
Use Product Suggestions?	Determines whether the user is offered suggested products in a dropdown. They can click a suggested product to be redirected to its detail page. These suggestions are based on Lucene index data. 	Default: enabled Toggle to disable	All
Use Prior Purchase?	Determines whether the user can choose to search from only their prior purchases (rather than all available products).	Default: disabled Toggle to enable	3.88
