

## Advanced quotation for domestic and export markets

The Advanced Quoting mode "ProntoFreightApproved" has been extended to allow for quotes to be placed in cases where freight is available and has been selected for an order at checkout. Additional processing in the Integrator now allows such quotes to be automatically advanced to a "quote reviewed status" at time of initial Integration without a need for actually having to be manually adjusted in Pronto. Note - Integrator version 4.58 required.
