

# Delivery Address B2C widget - country and state options

From version 4.03+, a new editing interface helps you update the country and state options on the [Delivery Address B2C Widget](#). The new editor groups each country with its respective state list, so you only have to enter state data in a simple format, rather than a long code string with curly brackets and semicolons and single quotes.

## Old UI

Country List

{'Argentina':'Argentina','Bermuda':'Bermuda','Bolivia':'Bolivia','Brazil':'Brazil','Belize':'Belize'

State List

{'United States': {'AL': 'Alabama','AK': 'Alaska','AZ': 'Arizona','AR': 'Arkansas','CA': 'Californi
