

Social Sharing widget

(Formerly known as the "Add This" widget)

A Social Sharing Plugin widget is now available for use in BPD. Insert the widget onto a template in the CMS, and configure customised content from [Add This](#) and other social sharing applications. The widget will then output the application's javascript on the page.

- Widget documentation - [Social Sharing Plug-in Widget](#)

Note that prior to version 4.10+, this widget was called the 'Add This' widget.
