Overview

With this promo type, you can create offers where you can give customers buying a set number of one Product a discount on a set number of the same Product or a different Product. You can also use this promo code with a Product with variants.

This Product promo code allows you to give customers a discounted price for a specified quantity (Y) of a product when they buy a certain number (X) of a specific product. You can work this promo in different ways. One is some variation of the 'buy two pizzas, get one garlic bread at a discounted price'. Another is the 'buy two pairs of glasses, get one at the discounted price' offer. It can also be used with Master products so that all child products are automatically included. (See [Special use with Master product](#) below.)

Step-by-step guide

This guide will help you create a promotion using this promo code type.

1. In the CMS, navigate to **Campaigns & Promotions** *Promotion Codes*.
2. Click **Add Promotion Code**.
3. In the **Select Promotion Type** list, select **Product**.

4. Select the scenario **'When I buy X quantity of specific product then I can buy Y quantity of specific product at a specified price'**.

Select Promotion Type:

Product ▼

Selected Scenario:

Repeat Product % Discount Promotions

With this promotion, once the customer buys the required minimum they'll not only receive a % discount on the promo product, but they will also receive a repeat promo code via email. Your customer can then return to purchase more promo products at the discounted price, without having to meet the minimum quantity again.

When I buy X quantity of specific product then I can buy Y quantity of specific product at a specified price

Using this promotion code, the customer can buy a product at a specific price after buying the required quantity of an eligible product.

Quantity Break Pricing

Using this promotion code, the customer gets a discounted price on a particular product after purchasing the required quantity.

5. Enter the **Promotion Code** your customers will use at checkout.

Promotion Code *

CheapGarlicBread

📘 The code that the end user enters into the 'Apply Promotion Code' field 🏠

6. Enter a **Description**. This will be displayed in the user's cart and in their order summary.

Description *

\$1 garlic bread when you buy 2 large pizzas

📘 The description of the promotion code when it is displayed on the cart and order summary 🏠

7. Set the promotion's **Start and End Dates**.

8. Enter the **Discount Quantity Threshold**. This is the number of qualifying product your customer must purchase to be eligible for the discounted pricing.

Discount Qty Threshold

2

📘 The total quantity of eligible products on the order must meet this threshold before the promotion code will apply 🏠

9. Add the **Eligible Product**, searching by either description or code. (Once you click **Add**, the description will be replaced by the code only).

10. Add the **Special Price Product**, again searching by description or product code. This product can be different from the Eligible Product (as in the pizza and garlic bread example) or the same (as in the glasses example).

Special Price Product

Product Code

CV409 ▼

11. Enter the **Qty** of the product your customer can buy at the discounted price when they qualify for the promotion.

Qty *

1

Price *

1.00

12. Decide whether this promo will **Apply In Multiples**. That is, if 2 pizzas qualifies your customer for 1 cheap garlic bread, then 4 pizzas will entitle them to 2 cheap garlic breads.

☒ **Apply In Multiples**

📘 If the order meets the threshold multiple times, the promotion will be applied in the equivalent multiple. (e.g. Buy X quantity of product ABC at a fixed price for every Y quantity of eligible products purchased.)

13. Click **Save & Exit** to finish creating your promo code.

Please be aware that there are also additional [advanced options](#) that you can configure for promotions. They become available after the promo is created. You'll find info on these under [Advanced Options](#), later on this page.

Special use with Master and Child products (variants)

Master products are products that have child products (variants). (For details on how they work, see the [Product Variants](#) page.)

You can use this promo code type with products in a Master/Child relationship in various ways. For example, 'buy any 2 variant products in a Master product range and get 1 at a discounted price' - 'buy any 3 large pizzas in our premium range and get 1 for \$10'. Or 'buy 3 of a specific product and get 1 different product (any variant of a Master product) at a discount' - 'buy 3 pizzas and get 1 2L softdrink for \$1'.

Use Case

In the use case here, our store sells medical garb and wants to use the promo code to encourage the purchase of matching tunic and trousers. For the promo along with the matching tunic, are added as Child products. A customer must buy one of each to get the tunic at a discount price.

Master Product and eligible Child Product

Promo Codes - Additional Options

Access Additional Options

To access Additional Options:

While in the saved promo code, navigate to **Options** *Edit Additional Options*.

OR

If editing an existing promo code, scroll down its page and open the collapsed **Additional Options** section.

+ Additional Options

Misc

- **Status** - the current status of the promo code
 - **Active:** the promo code is live on your site and can be used by customers. It has not been disabled or deleted.
 - **Disabled:** the promo code cannot be used by customers. You can switch it to 'Active'
 - **Deleted:** the promo code is deleted from use altogether and is kept for historical records only. (**NOTE** - A deleted promo code can be undeleted to 'disabled' and then reactivated.)
- **Criteria Fail Remove Promo Code**
 - **ON:** the promo code is automatically removed from the cart when contents get updated and promo requirements are no longer met. Users must re-enter the promo code if they want the code to be applied;
 - **OFF:** the promo code remains in the cart when requirements are not met. If contents get updated and requirements are now met, it will be (re-)applied.
- **Not Applicable With Other Offers;**
 - **ON:** promo code cannot be used when other promo codes have already been applied to the order;
 - **OFF:** promo code can be used when other promo codes have been applied to the same order.

IMPORTANT

Letting customers use more than one promotion code in an order must first be enabled by Commerce Vision. Contact CV Support and request stacked promotions to be enabled.

- **Free Product To Be Added in Pronto** (applies only for Promo Codes that add a free product)

For Promo Codes with free products, you can choose between adding the free product online upon order submission or in the ERP (Pronto) when the order is integrated. Toggle ON or OFF **Free Product To Be Added in Pronto**. Default: OFF

Free Product To Be Added In Pronto

In the order placed, received and confirmation emails, how the free product is displayed depends on the option selected.

- When OFF, the free product is added online. In the emails, the free product displays as an item with a cost of \$0.00 in the product order line of your Order Summary

NOTE - For the free product and quantity to appear as an order line item in the sales receipt, they must be added to the sales order manually in Pronto after integration.

- Postcode Exclusion List** - (for free freight promo codes only) If required, enter single postcodes and/or postcode ranges (each comma-separated) to exclude. Follow Australia Post's four digit conventions so a three digit code would be '0200' instead of '200'.

Roles

Include or exclude the promo code based on whether customers are B2B, B2C or both.

For versions lower than 4.31

 Roles	Applied To
	B2C and B2B
	B2C
	B2B
	B2C and B2B

Applied To: Select customer group: B2B, B2C or both.

For versions 4.31+

 Roles To limit this promo code by Role, added Role(s) must be of the role type(s) selected in Applied to e.g. if B2C was selected in Applied To, Roles selected must be B2C ones.	Applied To
	B2C and B2B
	 
Role	Delete?
	
☐ Promo active for all roles excluding the ones listed above	
 	

- **Applied To:** Select customer group: B2B, B2C or both.
- **Roles:** (For versions 4.31+) Specify Role(s) for the selected customer group(s) Click **Add Role**  , then in the dropdown, select the **Role**. If another role is needed, repeat this step. **IMPORTANT-** For added Roles to be valid, they must fall under the customer group added in 'Applied To'.
- **Promo active for all roles excluding the ones listed above:** If OFF, the added roles can apply the promo code. If ON, the added roles cannot apply the promo code.

☐ **Promo active for all roles excluding the ones listed above**

Usage Limits

Limit the maximum number of times the promo code can be used. For unlimited use, leave at the default of '0'.

- **User Usage Limit:** limit the number of times an individual user can apply the promo code (available only if the promo code is for B2B users)

- **Customer Usage Limit:** limit the number of times an individual Customer Code can apply the promo code

- **Global Usage Limit:** limit the total number of times the promo code can be used site-wide.

- **User List:** (For versions 4.10+) You can also specify one or more users (comma-separated list) who can use the promotion code. **NOTE** - If one or more users are added, any user not in this list cannot apply the promo code to their order.
