## Where can the Widget be placed?

The widget can be used in the following templates:

- B2C Registration Verification Required Email

## Widget Options

Option	Use	Comments

Description	A short description of the widget's use.	We recommend this field be updated so the widget's purpose is clear at a glance from the template page.
Layer	The layer the widget is valid for.	<p>The <a href="#">layering technology</a> allows for the content to be shown to specific audiences.</p> <p>This is handy if the content is only valid for a certain type of user or if the same widget is required for more than one audience but different configurations.</p> <p>The widget can be added to the zone more than once and the layer feature determines which audience can see each widget.</p>
Message Content	Text of the email message to user when they have successfully verified their email address	<p>Default:</p> <p>Dear {firstName}</p> <p>Thank you for registering for {companyName}. Your account has now been activated.</p> <p><b>To Login:</b></p> <p>Go to <a href="#">Login Page</a></p> <p><b>Username:</b> {emailAddress}</p> <p><b>Password:</b> (Not provided for security reasons)</p> <p>Placeholder information is automatically populated:</p> <p>firstName - first name supplied when user registered</p> <p>companyName - name of your business or site</p> <p>emailAddress - email address supplied when user registered</p>
