# Items Meta Data Filter Widget

Widget Use

Configures the data source and filtering options when Server Side filtering mode is selected for the Article List Features filter.

Example of Widget Use

Following is an example of the widget in use:

Where can the Widget be placed?

The widget can be used in the following templates:

- Article List Page Template
- Article List All Template

Widget Options

Option	Use	Comments	Available from Version
Description	A short description of the widget's use.	We recommend this field be updated so the widget's purpose is clear at a glance from the template page.	All
Layer	The layer the widget is valid for.	The layering technology allows for the content to be shown to specific audiences. This is handy if the content is only valid for a certain type of user or if the same widget is required for more than one audience but different configurations are needed. The widget can be added to the zone more than once and the layer feature can determine which audience can see each widget.	All
Table Name	The name of the table filtered against	Default: Article Leave as the default unless customisation has been done for this feature.	4.23
Data Source Name	Name of Data source for filtering	Default: ArticleList Leave as the default unless customisation has been done for this feature.	4.23
Meta Data Filter Label	Text for the features filter label	Default: 'Filter by'	4.23
