## Widget Use
Used in the B2C Registration Verification Notification email template to alert your online team or a staff member that a user has registered on your website.

## Example of Widget Use

## Where can the Widget be placed?

The widget can be used in the following templates:

- B2C Registration Verification Notification Email

## Widget Options

| Option | Use | Comments |
| --- | --- | --- |
| Description | A short description of the widget's use. | We recommend this field be updated so the widget's purpose is clear at a glance from the template page. |
| Layer | The layer the widget is valid for. | The layering technology allows for the content to be shown to specific audiences. This is handy if the content is only valid for (i) a certain type of user or one audience but different configurations are needed.<br><br>The widget can be added to the zone more than once and the layer feature determines which audience can see each widget. |

| Message Content | Contains the message in the alert email to your team or staff member when a user registers | Default:<br><br>**{emailAddress}** has registered a user-login for access to this website as a B2C customer.<br><br>The account is currently disabled. The account will be automatically enabled pending email verification by the user.<br><br>The placeholder 'emailAddress' will contains the registering user's email address. |
