# Product Item Widget

Widget Use

Renders product information in a Product List page. The Product Item widget is employed where 'zoned' product layout is *not* in use.

Example of Widget Use

Following is an example of the widget in use:

Where can the Widget be placed?

The widget can be used in the following templates:

- Product List Item Template

Widget Options

Option	Use	Comments	Available from Version
Description	A short description of the widget's use.	We recommended this field be updated so the widget's purpose is clear at a glance from the template page.	All
Layer	The layer the widget is valid for.	The layering technology allows for the content to be shown to specific audiences. This is handy if the content is only valid for a certain type of user, or if the same widget is required for more than one audience, but different configuration is needed. The widget can be added to the zone more than once and the layer feature can determine which audience can see each widget.	All
Show RRP?	Determines whether the product's Recommended Retail Price is displayed.	Default is: unticked Tick to enable	All
Show Ribbons?	Determines whether product ribbons are displayed.	Default is: ticked Untick to disable	All
Show Quantity Breaks?	Determines whether pricing quantity breaks are displayed.	Default is: unticked Tick to enable	All

Show APN Instead Of Product Code	Determines whether the Australian Product Number is displayed in lieu of the product code.	Default is: unticked Tick to enable	All
Increase Quantities In Pack Qty?	Forces the value in the quantity field to increase/decrease in pack quantities when using the plus/minus icons, rather than by the default quantity of 1.	Default is: unticked Tick to enable	All
Show Unit Description?	Determines whether unit of issue is displayed.	Default is: unticked Tick to enable	All
Show Availability?	Determines whether stock availability is displayed.	Default is: unticked Note that when the System setting, EnableStoreAvailabilityClickAndCollect, is in use then this setting is not used. Instead a subset of Delivery and Pickup icons are always shown.	All
Use Role Flag To Hide Availability?	Determines whether the role flag is obeyed in regard to stock availability display.	Default is: unticked Note that when the System setting, EnableStoreAvailabilityClickAndCollect, is in use then this setting is not used. Instead a subset of Delivery and Pickup icons are always shown.	All
Show Quantities?	Determines whether available quantity is displayed.	Default is: unticked Tick to enable	All
Strip Zero Decimal Amounts	When the price is an even dollar amount, the cents are stripped from the display. (For example, $147.00 would be displayed as $147)	Default is: unticked Tick to enable	3.88
Show Product Options?	Determines whether product options (attributes) are displayed.	Default is: ticked Untick to disable	All
Show Top Product Options Add Button?	Determines whether an Add To Cart button is displayed at the top of the product options grid.	Default is: unticked Tick to enable	All
Show Bottom Product Options Add Button?	Determines whether an Add To Cart button is displayed at the bottom of the product options grid.	Default is: ticked Untick to disable	All
Attributed Product Price Display	The method for calcuating pricing of attribute products. Select from: ○ Default Functionality ○ Don't Show ○ Price From Default ○ Price From First	Default is: Default Functionality Select via drop-down	All
Category URL Prefix	The prefix inserted into the category URL before the category name. Primarily used during existing site upgrades to BPD, where it is desirable to maintain existing URLs.		All
Product URL Prefix	The prefix inserted into the product URL before the product name. Primarily used during existing site upgrades to BPD, where it is desirable to maintain existing URLs.		All
Titles			
Product Options Heading Text	The heading text displayed above the product options grid.	Default is: Product Options	All
Buttons

Add To Favourites Button Text	The text on the Add To Favourites button.	Default is: Add to favourites	All
Is Favourites Button Text	The button text displayed after the item has been added to Favourites.	Default is: Favourite	All
Product Options Add Button Text	The text displayed on the Add To Cart button on the product options grid.	Default is: Add selected to cart	All
Prompts			

RRP Prompt	The label for the RRP field.	Default is: RRP	All
Quantity Breaks Prompt	The label for the quantity break display.	Default is: Multi Buy	All
My Price Prompt	The label for the 'My Price' field.	Default is: My price	All
In Stock Prompt	The text displayed for available products.	Default is: In Stock Note that when the System setting, EnableStoreAvailabilityClickAndCollect, is in use then this setting is not used. Instead a subset of Delivery and Pickup icons are always shown.	All
Out Of Stock Prompt	The text displayed for unavailable products.	Default is: Out Of Stock Note that when the System setting, EnableStoreAvailabilityClickAndCollect, is in use then this setting is not used. Instead a subset of Delivery and Pickup icons are always shown.	All

Other Widgets

- Order Payment Links Form Widget — Renders an order details stepper with an order form that can be automatically populated with query strings, and/or manually entered by the user. The form doesn't validate the order details are accurate in order to stay both secure and accessible to unauthenticated users.
- Magic Link Authentication Message Widget — Renders the Magic Link authentication message.
- CUSTOM_Side by Side Content Tiles Widget — Renders two side by side content tiles in a zone with widget options for selecting or adding background colour, image, text and link/button positioning.
- Stock Dialog Widget — Displays the Stock to Receive Detail dialog window.
- Stock to Receive Widget — Displays the Stock to Receive page.
- Stock Levels Widget — Displays Stock Levels page.
- Order Declined Pending 3rd Party Installment Msg Widget — Renders the message body for the email sent when the user selects to sign up and pay with a Buy Now Pay Later provider but approval is subject to further checks.
- Order Field Static Widget — Renders an additional order field in email templates.
- Online Quote Validation Widget — Renders the appropriate message to the user after the current status of an online quote accessed via an email link is validated.
- Header Level Cost Centre Widget — Renders the cost centre input field on the order header in the shopping cart.
- Openpay Summary Widget — Renders Openpay marketing information for a product on the product detail page. Use this widget instead of the Product Purchase Details widget if you want to customise tagline placement on the template.
- Order Line Availability - Click and Collect Widget — Displays product availability and delivery methods at the order line level in dynamic scenarios such as the cart when Click & Collect is enabled.
- Account Activation Email Content Widget — Renders the message content in the Invitation to Register an Account email.
- Order Template Cost Centre Widget — Renders the cost centre input field on each product line in an order template.
- BPAY Account Payment Detail Widget — Renders BPAY payment information in the body of the BPAY Account Payment email. This email is sent to users who pay invoices or pay down their account balance using BPAY.
