Microsoft Azure AD SSO

Prerequisites

Microsoft AD Sign In must be implemented by Commerce Vision. For 4.30+

Overview

Single sign-in using Microsoft Azure Active Directory allows your Website Users to authenticate and sign in with their Microsoft credentials. Access can be restricted, forced or granted by email address domain name.

Customer Experience

On the login page/popup, along with the userid/password method, sign in with Microsoft is available.

CV ecomme	👤 Login		50.00 (ec.67)
E Shop by Chargery 3	Login with a shared network account	Login with email waves/ cells Journalison Convertie and Convertie and Convertie and Convertient and	• 75
R Free Stepper	Need a Commerce Vision at Create an account By signing in you agree to cur Terro by Over \$333	ccount? & Constrom & Privacy Paticy © Expert Advice	Exploran

When the user selects this method, the system checks your site's settings to see if they can log in this way:

Restricted: If there is a restriction, they will be redirected to use the userid/password method.

Available: If there are no restrictions, the user can enter their Microsoft sign in details and have to approve it. If they're already signed into their Microsoft account, they will be logged in without having to approve it,

Step-by-step guide

This guides you through the configurations for Microsoft Azure Sign-In for your site.

```
Before You Begin...
```

Have at hand the Application (Client) ID and Directory (Tenant) ID (if these have not been entered).

Configure Microsoft Sign-in

- 1. In the CMS, go to Settings Settings Feature Management User Third Party Logins
- 2. Click Configure.

Microsoft

3. Scroll down to the Microsoft section.

Microsoft Sign-In
