Order Tracking / Order History

(i) Need customised fields and functions?

This guide describes the extensive out-of-the-box options available for the Order Tracking function. But perhaps your customer orders capture additional information that you want to be searchable or displayed in Order History, e.g., Job Number, Procurement Reference, or Actual Delivery Date? For implementation of custom fields and options, please contact Commerce Vision.

Overview

Online order tracking allows your customers to look up an invoice or their entire history of submitted orders. Using the standard filter, a search can be limited to return only orders that are:

- completed
- rejected
- returns
- · awaiting approval, or
- outstanding.

For B2B customers where one account can have more than one user, and/or one user can be linked to multiple accounts, Order History can be set to allow the user to view:

- only the orders they submitted, OR all orders on the Customer account
- only the orders for the Customer account they are currently in, OR all orders for all linked Customer accounts.

Set Order Tracking options

Administrators can open the Track Order Widget to configure options and the display of:

- · search fields in the Search order tool
- search results displayed (via columns)
- · order details page

Search tool

R Check the status of your order

FAQ \oslash

A: The Order History is a record of ALL orders and will always include completed orders. Pay Accounts is only for outstanding invoices.

Customer Experience

NOTE - Order tracking is available to a user only if enabled at the user's Role level. The functionality is generally enabled for B2B customers but can be made available to any user group.

(1) Your customer accesses Order Tracking on the Dashboard menu when logged in. The menu item is usually called 'Track Orders' or 'Order History' but can be different depending on what your business wants to label it.

Step-by-step guide

Enable Order Tracking

NOTE - Order Tracking is usually already added and enabled by Commerce Vision for your site. However, if the page has been removed and you want to re-add, here is how to do it.

To enable Order Tracking:

| Add OrderSearch.aspx as a new | |
|---------------------------------------|--|
| | w menu item. See Adding a new menu item for further details. |
| Menu Code : | : Customer Self Service |
| Menu Item Code : | : ORDTRACK |
| Parent Item : | : ORDERS - Orders |
| Label for Navigation Pane : | : Track Previous Orders |
| Description : | : Track Previous Orders |
| Page Name : | : OrderSearch.aspx Order Searching |
| Custom Page Code : | Please Select |
| Sequence : | : 2 |
| Menu Item Image Name : | : |
| Menu Item Hover Image Name : | : |
| Requires Authentication : | : |
| Hidden : | : |
| Staging Only Item : | : |
| Show Navigation Order Summary : | |
| Width : | |
| Separator : | |
| Parameter : | ; |
| Help Page : | : |
| Enable Product Category Populate : | : • No • Yes |
| Category Populate starting category : | : |
| Category Populate to Level : | |
| | Trade Brovious Orders |
| Page Description for Site Map : | |
| Background Image Name : | : |
| | |
| ALT Tag for Image items : | : |
| | |
| Track In Analytics : | : 🖉 |

8. Enter the label name and details for the menu item as well as where it will be located in the User's navigation menu. The label usually used is 'Order Tracking' or 'Order History'.

Update Order Tracking Settings

Options and settings for the Order Tracking page are configured in the Track Order Widget. Enable and disable settings and functions, edit texts for labels, buttons and fields for:

- Search order tool
- search results display (via columns)
- order details page

To edit the Track Order Widget:

- 1. In the CMS, go to Content Pages & Templates.
- 2. Use the **Search** tool to find the 'Track Orders' template.
